Produced with NO Green House Gas Emission

The charring of the coconut shell is done in a reactor to capture all the Methane and VOC gases and convert them into useful energy. This pollution free high quality char is steam activated with the latest technology in a rotary kiln to produce high quality Activated Carbon with exceptionally high performance.

Green Blocks are WQA Gold Seal Certified for NSF 42 and 53 certification and have NSF certification for Material Safety.

Replaceable Eco-Carb™
Part No. H2O-ECOCARB

Included

Faucet Adapter Kit
